Equipment that can be
loaded on this tripod
This product has been designed
to handle equipment weighing
under 5 kg (11 lbs).
Do not overload.
Some equipment weighing
under 5 kg (11 lbs), such as long
lenses, may not balance well
due to its weight distribution.
In such case, select a larger
tripod.

Care of the tripod
- DO NOT apply any grease or oil to this product.
- Clean with mild detergent and a soft cloth only.
- DO NOT use very close to flame. Avoid extreme heat.
- Avoid dropping or giving the tripod a rough handling.
- DO NOT disassemble or repair this tripod.

Carrying the tripod
Prohibition
Carrying a tripod with a camera left on can result
in unexpected accidents. We, therefore,
recommend you to remove your camera while
carrying the tripod.

Pan head mounting post
Prohibition
Do not attach a camera directly to the
attachment screw of the center column.
This may damage both your camera and tripod.

In case of the shock given to
tripod by force
Caution
When the shock has been given to the tripod
and legs such as falling down, check carefully
whether there are cracks, flaws, etc. on the
pipes or not.
When you find some cracks, flaws, etc., on
the pipes, stop to use it and ask to repair. It may
be wounded when some of fibers come out from
the pipes. In that case do not touch it.

Do not use an optional Clamp head for a carbon fiber tripod. The pipe may be damaged.

Panhandle are installed as shown. There is not difference in length between the panhandle. Panhandle is installed in both side.

Remove the vertical tilt handle from the panhead and screw into the back of the pan & tilt handle.

Use the following instructions if you wish to change to another heads, or attach accessories.
First, lock the panning lock knob, then grasp the pan or vertical tilt handle and turn the head counter-clockwise to loosen.

Set the new head, or accessory on the tripod's threaded post, and turn clockwise until it comes to a stop. Tighten the panning lock knob and turn clockwise slightly more.

Adjust the built-in level to fit into the middle.

Remove the quick release platform turning the lock lever. In this case, please do not put the lock lever back by force as it has been stood by the stopper.

To change the angle of each leg, close the leg slightly, and then pull the leg angle adjustment lock out. There is a choice of two other angle positions.

After choosing the desired leg angle, securely push in the adjustment lock.

Align the length of the platform along the base of the camera body, and securely tighten the mounting wing nut.

When you fix this quick release platform to pan head, the quick release lock lever will return to the original position automatically. We, however, recommend you to tighten this lever more to secure the fixing.

Remove the pan head when inverting or replacing the center column.

Remove the center column base stopper turning to the direction of arrow. Loosen the center column stopper and center column locking nut, then pull out the center column.

Loosen the pan & tilt handle, and the head will tilt back and forth.

Loosen the paning lock knob, and the head will rotate along the horizontal direction.

Loosen the vertical tilt handle, and the level can be adjusted.

Insert the center column from the lower side of the main body, tighten the center column locking nut and the center column stopper.
Make sure to re-attach the center column base stopper in order to prevent the center column falling out accidentally.

Please do not turn the center column stopper while a center column or optional short center column attached on. The internal parts may be damaged.
