#### **!**\Caution

For fall breakage prevention of a camera, please extend a leg completely and use it in the

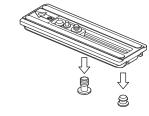

## Mounting the camera to the camera plate

Tighten a tilt lock lever. Loosen a camera plate lock lever turning in the direction of an arrow.

Please remove a camera shoe out behind the head, while pushing a camera mount shoe stopper.

When a camera is attached to the quick release plate directly, the camera screw (3/8) must be removed from the quick release plate. To remove the camera screw (3/8), push out the rubber cap and slide out the camera screw (3/8).

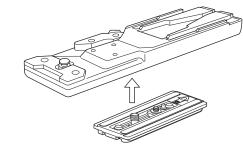

Attach the camera plate by matching it to a tripod mounting screw on the your video camera.

If you video camera has a camera alignment pin hole, match the camera alignment pin to it before screwing in the tripod mount screw.

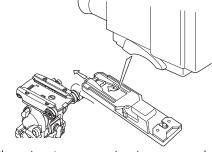

Tighten the tripod mount screw firmly after adjusting the position of the camera plate.

The camera screw, which can be used for a tripod adapter, etc., is attached. If needed, plase attach it from the back of the long hole of a camera shoe.

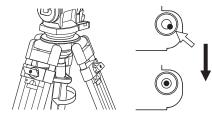

When a tripod adaptor is used, attach the tripod adaptor with the both screws. Tighten the tripod mount screw firmly after adjusting the position of the tripod adapter.

Please insert a camera shoe in a camera plate from the direction of an arrow to back pushing a shoe stopper. If a shoe stopper is released, a camera shoe stops releasing. Please fix a shoe lock lever in total in the good position of balance

## How to adjust the level of pan head

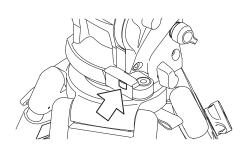

Adjust the level before putting the camera on the pan head.

- Loosen the bowl locking knob and adjust the bubble in the level to fit into the red color mark, while shaking the pan head.
- 2) Tighten the bowl locking knob. Remarks:

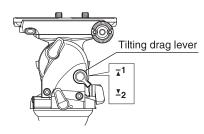

This is just rough aim and recommendable to test in advance before operating.

## **LED** lighting

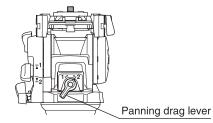

When the LED light button is pushed, a light in the level turns on for approximately 20 seconds. This will help when leveling the tripod in a dark place.

## Drag adjustment

The tilting drag can be adjusted by the tilt drag lever.

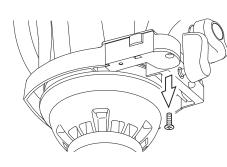

The position 1 has less drag than the position 2. In case the drag is not changed when the position has set to the position 2, move the panhandle to the tilt direction.

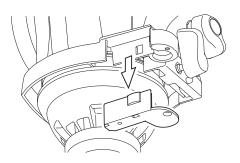

The panning drag can be adjusted by the tilt drag lever.

The position 1 has less drag than the position 2. In case the drag is not changed when the position has set to the position 2, move the panhandle to the pan direction.

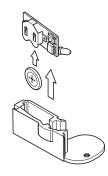

### Install a battery

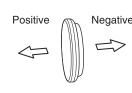

If the light is not brighten or getting darker, it is the time to replace the battery. Remove a screw on the bottom of the pan head.

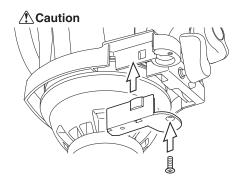

Pull out the LED unit but be careful not to pull out the unit by force, doing so may result breaking the unit.

Install a battery model CR1220 with in the correct direction of the battery contacts.

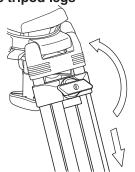

The battery must be a CR1220. The battery included with the unit may not last a long time.

Re-confirm the battery properly installed. Put back the LED unit into the pan head and restore a screw.

If the LED light is not used for a long time, remove a battery from the LED unit.

#### Extending the tripod legs

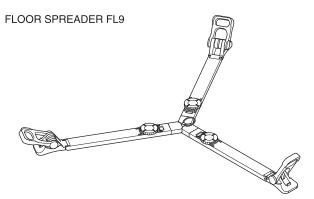

Loosen the Leg lock lever (Upper) to extend or shorten.

Loosen the Leg lock lever (Lower) to extend or shorten. Loosen the brace length adjustable lock lever to extend or shorten.

## How to attach footpads and floor spreader

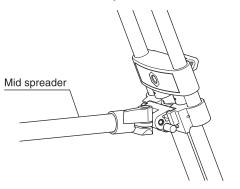

Put the spike of leg-tip on the roller of footpats and hook a rubber hook on the leg-tip.

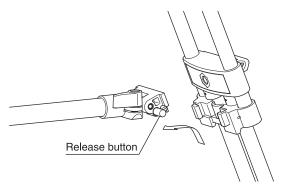

Please also attach a floor spreader in the same way.

## To remove mid-level spreader

Remove the mid-level spreader when using the tripod with a dolly (sold separately).

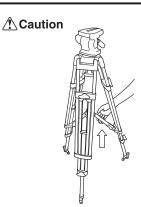

Push the release button of right and left in the tip part of a mid Level spreader, and remove the mid-level spreader sliding each attachment point in the direction of the arrow shown in this diagram. Do this to all legs to completely remove the spreader.

## How to open and close the tripod legs

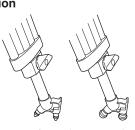

Holding two legs, one in each hand, tilt the tripod on its third leg. Pull the tow legs you are holding outward, and all three legs will open at

To close the legs, be sure to first raise the leg brace up slightly, and then push the legs close. In this case, please take care of your fingers.

## Choice of rubber or spike leg tips

Spike tips are useful outdoors especially on loose grounds or on rocky terrain. Rubber leg tips are recommended for indoor works.

To use the spikes, turn the rubber tips clockwise sevelal times until they stops.

To get the rubber tips back into the position, just turn it counterclockwise.

## Care of the tripod

- DO NOT apply any grease or oil to this product.
- Clean with a mild detergent and a soft cloth only.
- DO NOT use close to flame. Avoid extreme heat.
