**Equipment that can be loaded on this tripod**

⚠️ **Prohibition**

This product has been designed to handle equipment weighing under 3 kgs (6 lbs 10 oz). Do not overload.
Some equipments weighing under 3 kgs (6 lbs 10 oz), such as long lenses, may not balance well due to its weight distribution. In such case, please use a larger tripod.

---

**Carrying the tripod**

⚠️ **Prohibition**

Carrying a tripod with a camera left on can result in unexpected accidents. We therefore, recommend you to remove your camera while carrying the tripod.

---

**In case of the shock given to tripod by force**

⚠️ **Caution**

When the shock has been given to the tripods &/or legs such as falling down please check well whether there are cracks, flaws, etc. on the pipes, or not. When you find any cracks, flaws, etc. on the pipes, please stop to use it and ask to repair. It may be wounded when some of fibers came out from the pipes. In that case, please do not touch it.

---

**Clamp head**

⚠️ **Prohibition**

Do not use an optional Clamp head for a carbon fiber tripod. The pipe may be damaged.

---

**Setting up**

⚠️ **Caution**

To prevent accidental equipment fall or tripod tipping over, making sure all levers, knobs and handles on the tripod are securely tightened. And all of the three legs are opened all the way.

---

**Head setting**

Set the new head or accessory on the Pan head attachment screw. And turn the head clockwise until it comes to stop. Tighten the Panning lock knob and turn clockwise slightly.
Extending the Tripod legs

When you extend the legs, please proceed from the upper section. When you fold the legs, please proceed from the lower section. It will be steady to grip the upper part of pipe just above the lock nut.

Prohibition

Do not remove the nut and take out pieces. If it has been removed, insert the pieces as per the above specification.

Three position adjustable legs

Match the space between the Stoppers and jutting inside the upper pipe when the pipe is connecting.

To change the angle of each leg, close the Leg slightly, and then pull the Leg angle adjustment lock out. There is a choice of two other angle positions. After choosing the desired leg angle, securely push in the Adjustment lock.

Operating the Center column

Possible to lock with two ways. A - by Screw-type Center column stopper. B - by Twist-type Center Column locking nut. Screw-type Center column stopper will be steady while sidlesipping. Twist-type Center column locking Nut will be no sidlesipping, but not perform well sometimes.

Inverting the Center column

Caution

1. Remove the Pan head when inverting or replacing the Center column.
2. Remove the Center column base stopper turning to the direction of arrow.
3. Loosen the Center column stopper and the Center column locking nut, and then pull out the Center column.

Insert the Center column from the lower side of Main body, and tighten the Center column locking nut and the Center column stopper. Make sure to re-attach the Center column base stopper in order to prevent the Center column from falling out accidentally.

How to get low position shots

Remove the Center column base stopper, and then remove the Lower part of Center column. Put the Center column base stopper on the Upper part of Center column.

Care of the Tripod

- DO NOT apply any grease or oil to this product.
- Clean with a mild detergent and a soft cloth only.
- DO NOT use close to flame. Avoid extreme heat.
