tents. Please refer to instructions closely to avoid accidents.

Components

| Camera mounting screw |
| Camera platform |
| Camera locking ring |
| Wrist strap |
| Tilt lock knob |
| Soft grip |
| Double grooved leg |
| Leg lock lever |
| Rubber leg tip |

Mounting camera to camera platform
Hold the camera firmly, and turn the camera mounting screw until the camera securely tightened.

How to use panhead
To tilt your camera once it is attached to the Slim-Pod II, loosen the Tilt lock knob by turning it counterclockwise.
To lock it in position, tighten the Tilt lock knob by turning it clockwise (be careful not to overtighten).

Note:
When you attach the camera to the camera platform, you can mount the camera more easily by tilting the camera platform to come in sight the threads of camera mounting screw.
Extending the leg

To extend the leg sections, open the Leg lock lever and extend the Slim-Pod II to the approximate desired height. Close the Leg lock lever by pressing them down.

You'll be glad to know the round tube design of your monopod’s leg are made for maximum strength. This prevents twisting and provides excellent torsional rigidity.

To take a 90° vertical photo

When you wish to change camera to vertical position, mount the camera as per figure above. Camera mounting configuration horizontal position. Then turn the Camera platform to tilt 90° from horizontal to vertical by using Tilt lock knob. When using vertical position, ensure the camera is securely tightened to the Camera platform.

Wrist strap

⚠️ Caution

As a safety measure it is advisable to hold the camera through the Wrist strap.

Carrying the slim-pod II

⚠️ Prohibition

To avoid any damage of camera, it is not advisable to carry the monopod with attaching camera. It is recommended that the camera should be removed from monopod after taking photographs.

Care of the slim-pod II

- DO NOT apply any grease or oil to this product.
- Clean with a mild detergent and a soft cloth only.
- DO NOT use close to flame. Avoid extreme heat.
