Extending / Folding of Tripod Legs

Flip up the Leg lock lever to extend or shorten any of the individual leg sections to the desired length. Press the leg lock lever flush against the leg to lock.

Operating the Center column

Center column can be locked with two ways. A. by Screw-type center column stopper. B. by Twist-type center column locking nut. Screw-type center column stopper is steady, but possible with sidetipping. Twist-type center column locking nut will make no sidetipping, however it is not enough to hold the center column sometimes.

To avoid unnecessary camera vibrations, try to keep the Center column height to a minimum. Also use the larger legs first when extending the legs.

How to get low position shots

You can get lower height as show above.

Care of the Tripod

- DO NOT apply any grease or oil to this product.
- Clean with a mild detergent and a soft cloth only.
- DO NOT use close to flame. Avoid extreme heat.

Setting up

- DO NOT attach camera directly to the threaded post of the Center column. This may damage both camera and tripod.
- To Prevent accidental equipment fall or tripod tipping over making sure all lever, knobs and handles on the tripod are securely tightened, and that all three legs are opened all the way.
Attaching a camera

To remove the Quick release plate, turn the Quick release plate locking lever. In this case, please do not put the lock lever back by force as it has been stopped by the stopper.

Insert the Camera mounting screw on the Quick release plate in the place of the tripod attachment screw of your camera. Turn the Camera mounting screw knob and fix firmly.

How to get vertical position (Continued)

4. Loosen pan & tilt handle for your camera to the front.
5. Turn the whole of pan & tilt handle.
6. Adjust pan & tilt handle to get vertical position.

Removing the Head from the Center column

To attach the plate, slide into Quick release plate slantways. It will be closed automatically after attaching.

Fasten the plate Locking Lever on tightly. It will be certainly fixed.

Using the Pan head

When you unlock the handle, your camera is free to move up and down.
When the pan & tilt handle is unlocked, you can pan & tilt simultaneously.

When you unlock the Camera platform locking knob, raise the knob to the vertical "release" position. The camera can be free to rotate.

Three position adjustable legs

To change the angle of each leg, close the leg slightly.
Then pull the 3-position leg angle adjustment locks.
There is a choice of two other angle positions.

Caution

Removing the Center column

Always remove the Pan head when replacing the Center column.

Caution

Center column base stopper should be attached.

It can be used for digital copy or close-up photography when a Center column is inserted from the bottom.
Remove a Center column base stopper.
Then, loosen a Center column stopper and Center column locking nut.

Insert a Center column from the bottom and tighten a Center column stopper and Center column locking nut firmly.
Please also be sure to attach a Center column base stopper for fall prevention.
